Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application has been examined. The RCE and Amendment filed 10/12/04 have been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1-2, 4-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Beckmann et al (6606559).

4. Regarding claim 1, Garg et al show a physical position navigation device for producing physical position navigation services and displaying a navigation image (Abstract, Figure 4, column 7 lines 1-14), including: application means for performing physical position navigation services based on information from an external unit (Figure 3, column 3 lines 50-60, column 4 lines 1-20), application control means for controlling application according to an internal state of the navigation device (column 3 lines 60-67,

Art Unit: 2174

column 4 lines 19-40 and 55-65, column 7 lines 15-43), screen control means for controlling display of the navigation image according to an instruction from the application means (column 7 lines 1-15, column 10 lines 31-65), and display means to display the navigation image according to the instruction (column 12 lines 5-27). The instruction is transferred between the screen control means and the application control means via a function call (column 10 lines 35-60), then to the application means via a function call (column 11 lines 1-30), and then to the screen control and then display via an event queue (column 11 lines 2-20 and 50-65).

5. Regarding claim 2, the external unit is via a network (such as GPS column 6 lines 30-40).

6. Claims 4 and 5 show the same features as claims 1-2 respectively and are rejected for the same reasons.

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.
